

## Guaranteed Admission Program Data Strategy

### Purpose

The purpose is to gather aggregate data at the sector and institutional level to inform the future of the Guaranteed Admission Program (GAP) beyond the 2022-23 academic year, and to respond to requests from external audiences about the impact of GAP, while recognizing different systems and abilities.

### Targeted Data Questions

- What is the number of unique GAP applications, for the 2022-23 academic year, at the following points in the admissions process: (1) school accounts set up, (2) names uploaded, (2) applications, (3) admits, (4) confirmations and (5) enrolled?
- What is the number of schools accounts and names, for the 2022-23 academic year, uploaded of 11th grade students?
- What is the number of unique GAP applications, for the 2022-23 academic year, by partner district or school?
- Optional: What is the retention rate of 2021-22 GAP students who enrolled in a participating institution for fall 2021?

### Data Variables

- By sector and by institution:
  - Number of unique GAP applications at the each of the following points in the admission process: (1) school accounts set up, (2) names uploaded, (2) applications, (3) admits, (4) confirmations and (5) enrolled.
  - Number of school accounts and names uploaded of 11th grade students.
